TM AntiVirus
BY TOTOTHEO MARITIME

Network Attack Protection

Heuristic Scanning

Ease of Management

Advanced Memory Scanner

Defence in Depth

Efficient

Botnet Protection

A comprehensive antivirus solution, optimised for the maritime market and **designed to protect the vessel** whilst minimising the impact on low bandwidth networks. TM Antivirus utilises the industry leading, well respected, endpoint antivirus solution from ESET.

TM Antivirus protects systems from viruses, malicious code, spyware, Trojans, password stealers and much more.

Implementing it along with TM Mail customers can benefit from multi-layered protection, providing defence in depth from cyber security threats.

Communicating for the future, **today -** Totally **trusted**, totally **Tototheo**

BENEFITS OF TM ANTIVIRUS

Remote management,
all vessels can be managed from shore

Simple install,
automated download, installation and
distribution to all networked devices

No manual updates,
small, weekly auto updates

Network attack protection,
improves detection of known network
vulnerabilities

Unique serverless distribution,
peer to peer distribution of updates
amongst connected devices

World class protection,
provides protection against viruses, malware and
diallers; offers real-time protection and system
monitoring as well as scheduled scans

Heuristic Scanning,
can identify specific, known malware or even
previously unseen or unknown malware that
indicate malicious behaviour

Auto scan,
automatically scans all new devices, such as
USB removable media, when inserted into protected
machines

Advanced memory scanner,
unique ESET technology that monitors the behaviours
of a malicious process

WHY TM Antivirus?

Without up to date antivirus software onboard, vessels' systems
are vulnerable. TM Antivirus protects against threats from
multiple sources making sure your devices and systems are
secure.
