MARITIME

TM Transfer is a data synchronization application that allows the transfer of files from a central location, regardless of file size or format. Utilizing the built-in powerful scheduler, tasks can run automatically with no human intervention.

With **TM Transfer** , data between the ship and shore are transferred efficiently, reducing time and administration required by IT reducing costs and probability of errors.

TM Transfer

RELIABLE AUTOMATED FILE TRANSFER

- Central Management
- Flexible
- Comprehensive Reporting
- Performance
- Automation
- Simple Task Management

WHY TM TRANSFER?

TM Transfer allows the automation of tasks with data file transfer without restriction of the file size. All tasks can be controlled centrally, removing the need for input from the crew.

A best in class data synchronisation application.

> ## Centrally controlled and managed
> Manage the file sharing without Crew intervention, fleet wide. Ability to assign multiple tasks from cloud access.

> ## Scalability
> Simple and easy to adapt to your business requirements.

> ## Performance
> Built-in resilience to volatile and unstable satellite communication networks.

> ## No limitations on file size or format
> Transfer anything from documents, reports, applications.

> ## Automation & bi-directional transfer
> Configure once and the system can transfer files from ship to shore and shore to ship.

HOW IT WORKS:

File transferred between Company infrastructure and Vessels. The Remote User can monitor the whole process and the results of the file transfer.
