TM 360VR

Leading the digital transformation of vessels

Get a high resolution truly interactive virtual tour of your ship on any computer tablet or phone as well as all major VR glasses. Discover clickable objects as you walk through your vessel. Immersive walkthroughs make the familiarization and learning experience widely accessible and tailor made.

Familiarization Interactive 360 Virtual Tours

Our solution provides users with an unparalleled experience, allowing them to fully immerse themselves in the ship by exploring various locations for familiarization or monitoring purposes. Get a virtual first-hand experience of your ship, with no need for downloads or plugins, each tour is compatible across computers, tablets, and phones (Android & iOS).

Immersive walkthroughs

Immersive walkthroughs have revolutionized the way knowledge is shared and digested. Our customized approach breaks down barriers of age, experience or technical ability - enabling everyone to gain a comprehensive understanding of any system or modification in record time!

Remote Inspections

Through our 360 Virtual tour we facilitate remote inspection allowing you to perform detailed inspections of seemingly inaccessible areas or high-risk environments. We create a full virtual tour that provides a realistic overview of the entire setup, allowing users to safely assess the situation from anywhere—no risky physical travel necessary.

TM 360VR

Additional Modules

Life Saving Appliances (LSA) & Fire Fighting Appliances (FFA)

Increase situational awareness for shore staff and first responders in case of an emergency. Quickly familiarize new crew, get a quick overview of inaccessible areas, and supplement shore support with a "real" environment. Mark, tag and detail your Fire & Safety plans quickly and easily for greater situational awareness.

3D Modelling Linking

Unleash the power of TM 360VR's interactive 3D modelling linking. Open and close components with ease and get an in-depth view of the inner workings. With 3D Modelling, you get to explore and understand machinery.

Centralized Data Management

Make your maintenance process easier and smoother with TM 360VR state-of-the-art technology. Keep track of all your equipment manuals, inventory and maintenance data in one place.

Immersive Cross-Platform Experience

Enjoy a cross-platform experience with our online and offline feature. TM 360VR works seamlessly with all major virtual reality glasses including the Oculus Quest.
